Yasmin Khalid YasmnKhalid Online portfolio

Professional Summary

Full-stack engineer with experience in **.NET, React, and Angular,** building **enterprise SaaS platforms on Azure** and **Kubernetes.** Focused on **secure authentication, clean architecture, and reliable, well-tested systems.**

Technical Skills

Backend: C#, .NET, ASP.NET, RESTful APIs, Redis

Frontend: Blazor, Angular, React, TypeScript, JavaScript

Cloud & DevOps: Azure, Docker, Kubernetes, GitHub Actions, ArgoCD, CI/CD

Databases & Data: MongoDB, SQL, Python (Pandas, NumPy), D3.js

Testing & Monitoring: xUnit, SonarQube, Splunk

Tools: Git, GitHub, GitLab, Jira

Work Experience

Core Full Stack Engineer — *April 2026 - now*

Aventra Group sdn bhd| *Marketplace team, maintaining a B2B SaaS platform from authentication to pricing, with multiple SaaS products integrated as microservices.*

- Built enterprise session management with database-backed sessions, cross-tab synchronization, and server-to-server logout for multi-tenant security.
- Implemented secure authentication flows, including refresh token generation and validation, and Forgot/Reset Password with OTP verification and dynamic email templates.
- Implemented SSO across the marketplace and its integrated products, an HRMS and hiring platform, a compliance platform (AG One Safe), and a learning platform (AG One Learn), each hosted as a microservice.
- Developed a browser geolocation service with caching, integrated into the Aventra Group's in house AI bot context.
- Built marketplace and product detail components, including a PriceCard with complex pricing controls, and upgraded Product Catalog search with context-based suggestions.
- Designed an "Export to Excel" feature for master data, and delivered Figma-to-code UI for onboarding and signup pages with front-end validation.

Full Stack Developer — *September 2025 - April 2026*

Inscale Asia Sdn Bhd|*SEB ADC* |*Worked on pension and insurance systems for a Scandinavian banking client.*

- Built a reusable analytics solution for a microfrontend platform, standardizing tracking across 5+ apps, cutting integration effort by ~40%, and improving reliability with Dead Letter Queue-based processing.
- Contributed to a Redis NuGet package with resilience and circuit breaker patterns, reducing excessive Splunk logging and monitoring costs.
- Helped integrate a new insurance administration system with the existing digital channel platform, visualizing pension and insurance data for Swedish customers.
- Set up CI/CD pipelines with GitHub Actions and Kubernetes manifests (Kustomize) for GitOps-based multi-environment deployments via ArgoCD.
- Wrote unit tests (xUnit) and assisted with end-to-end testing (Playwright), reaching >80% coverage (SonarQube) and reducing regressions.
- Worked with Sweden-based domain specialists in a multinational team, translating pension and insurance requirements into scalable solutions, and applied clean architecture through code reviews and design discussions.

Mobile Developer Intern — *March 2025 - July 2025*

Millennium Radius Sdn Bhd | *Worked on analytics and data solutions for Johor Palm Plantation*

- Built responsive executive BI dashboard for tablets using React Native, Expo, and D3.js, integrating real-time data from REST APIs.
- Co-designed a bookmarking feature that streamlined frequent data access for board-level executives.
- Built ETL pipelines with data engineers (AWS Glue, Python) and ran data profiling and anomaly detection with Pandas, NumPy, and Isolation Forest.
- Automated data quality reporting and email delivery via SMTP, saving ~6 hours per week

Education

Bachelor of Information Technology (Hons.) in Software Engineering
Universiti Kuala Lumpur Malaysian Institute of Information Technology

Diploma in Computer Science
MARA Professional College
